Navigating Manufacturing Hurdles

In today's dynamic manufacturing landscape, companies encounter hurdles such as

Inefficient Production Insights

These challenges

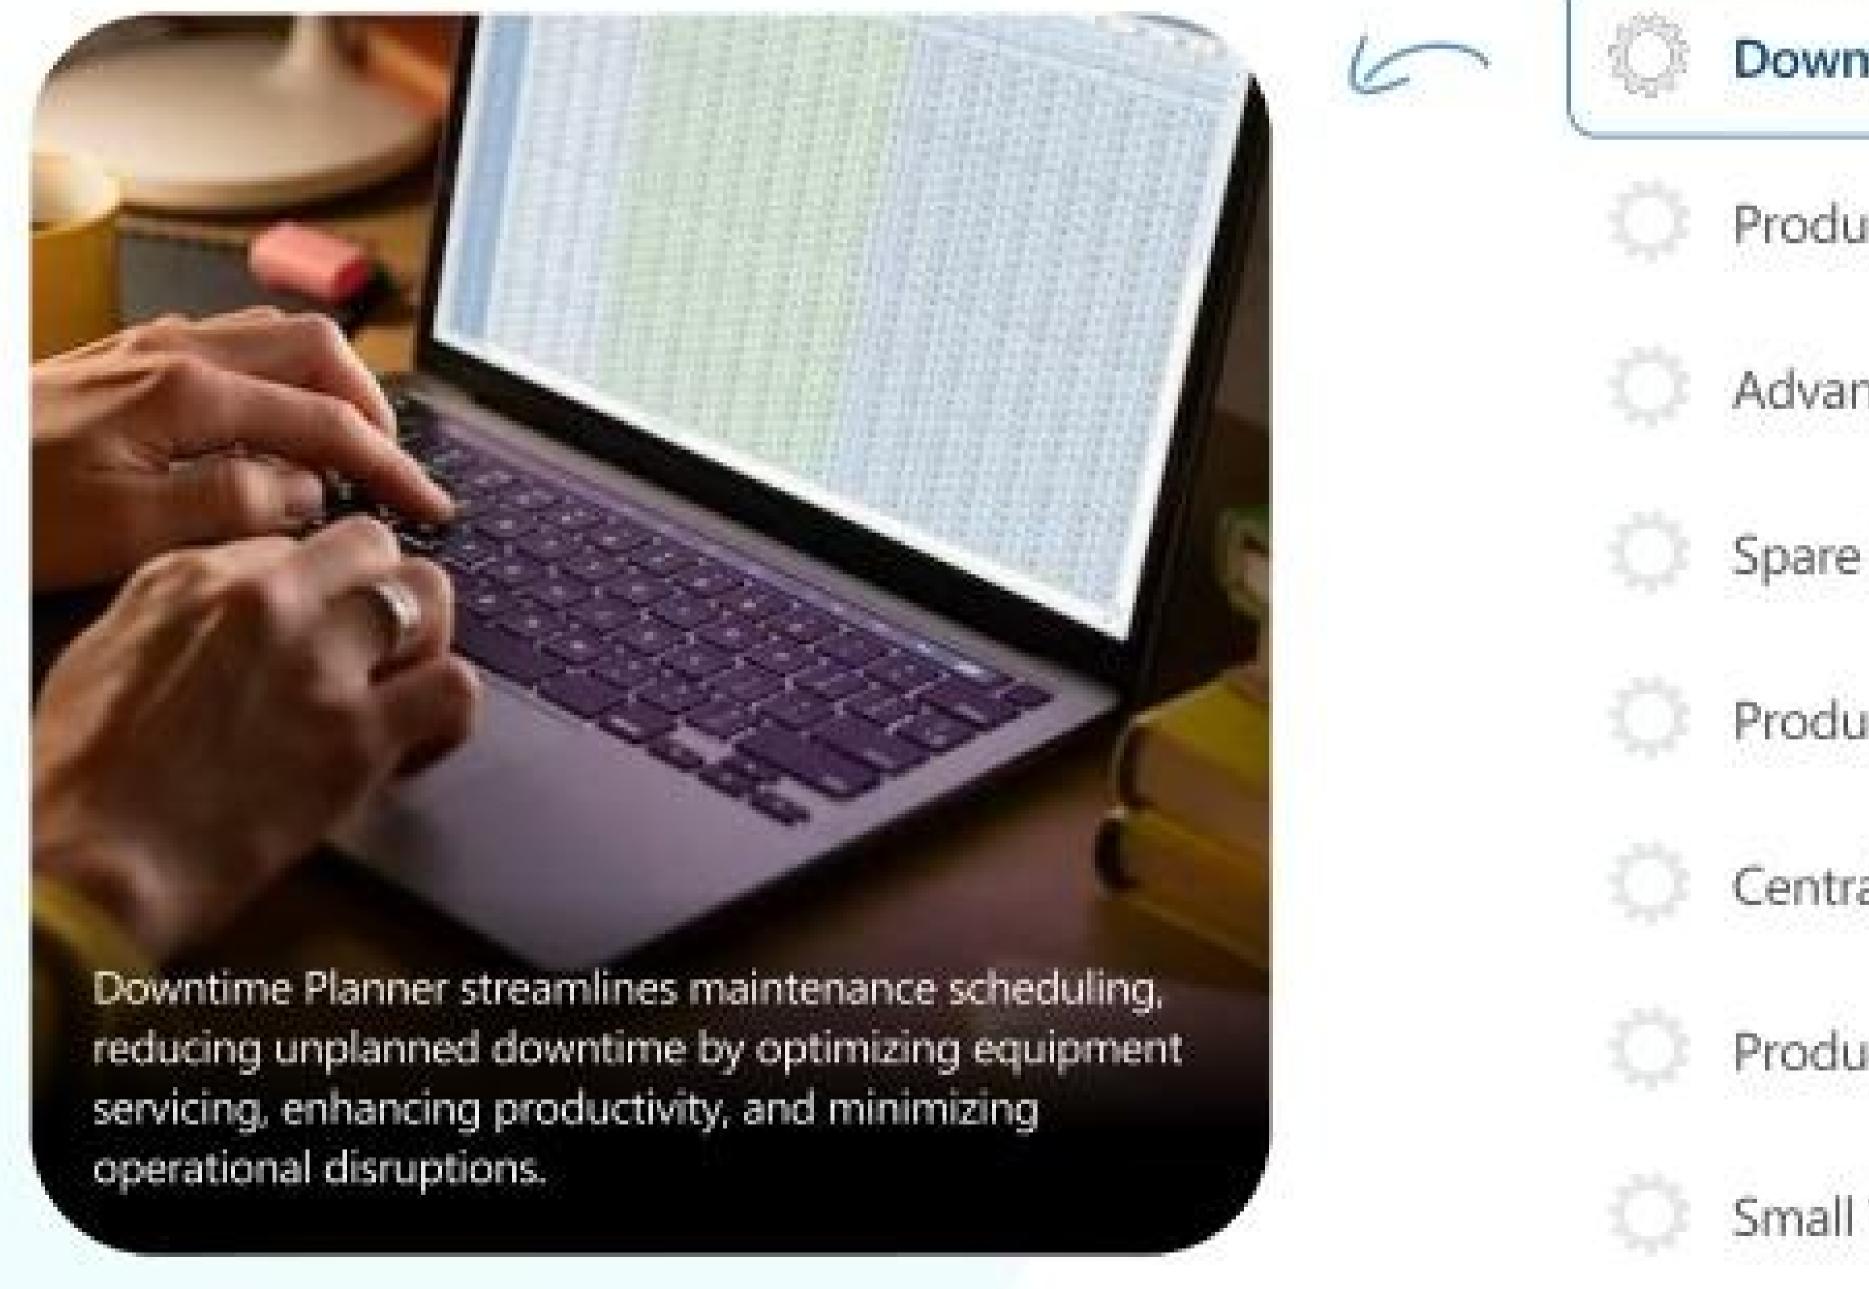

Demand Innovative Solutions

to enhance productivity and streamline operations

gears 4.0 addresses these challenges head-on with a

Suite of Features

By leveraging our solution, manufacturing companies can optimize efficiency, minimize downtime, and achieve seamless production control.

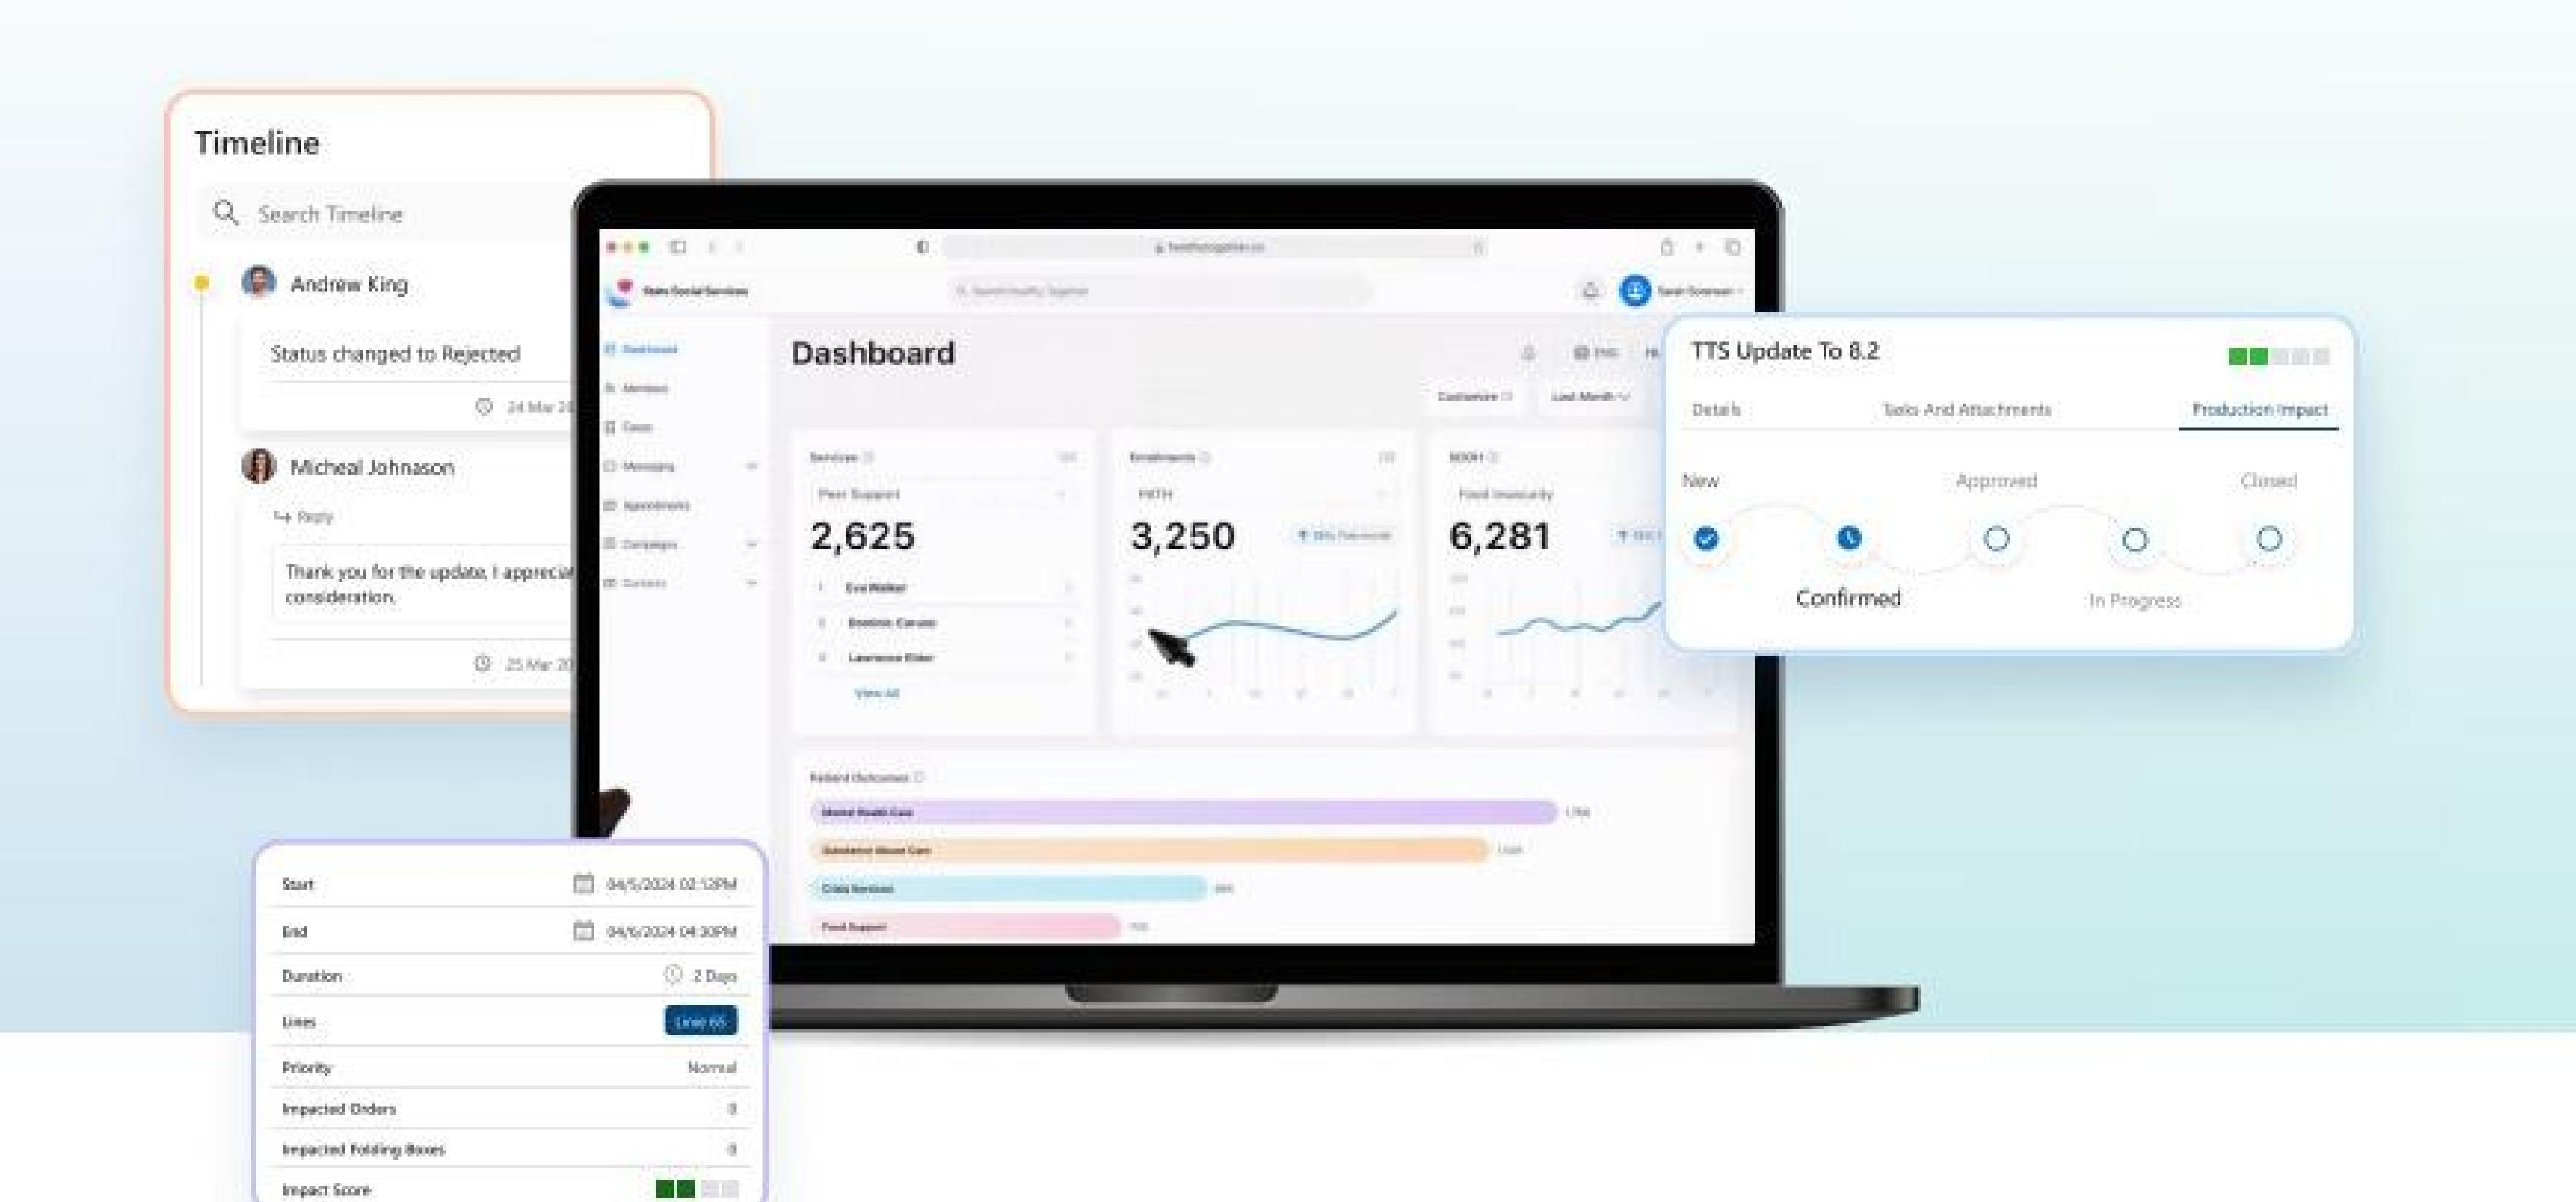

Downtime Planner

- Production And Serialization Insights
- Advanced Search And BI Center
- Spare Parts Management
- Production Line Remote Control Center
- Central Machine Log Repository (AI)
- Production Readiness Checks
- Small Volume Packaging Planner

A Sneak Peek into

Our Downtime Planner

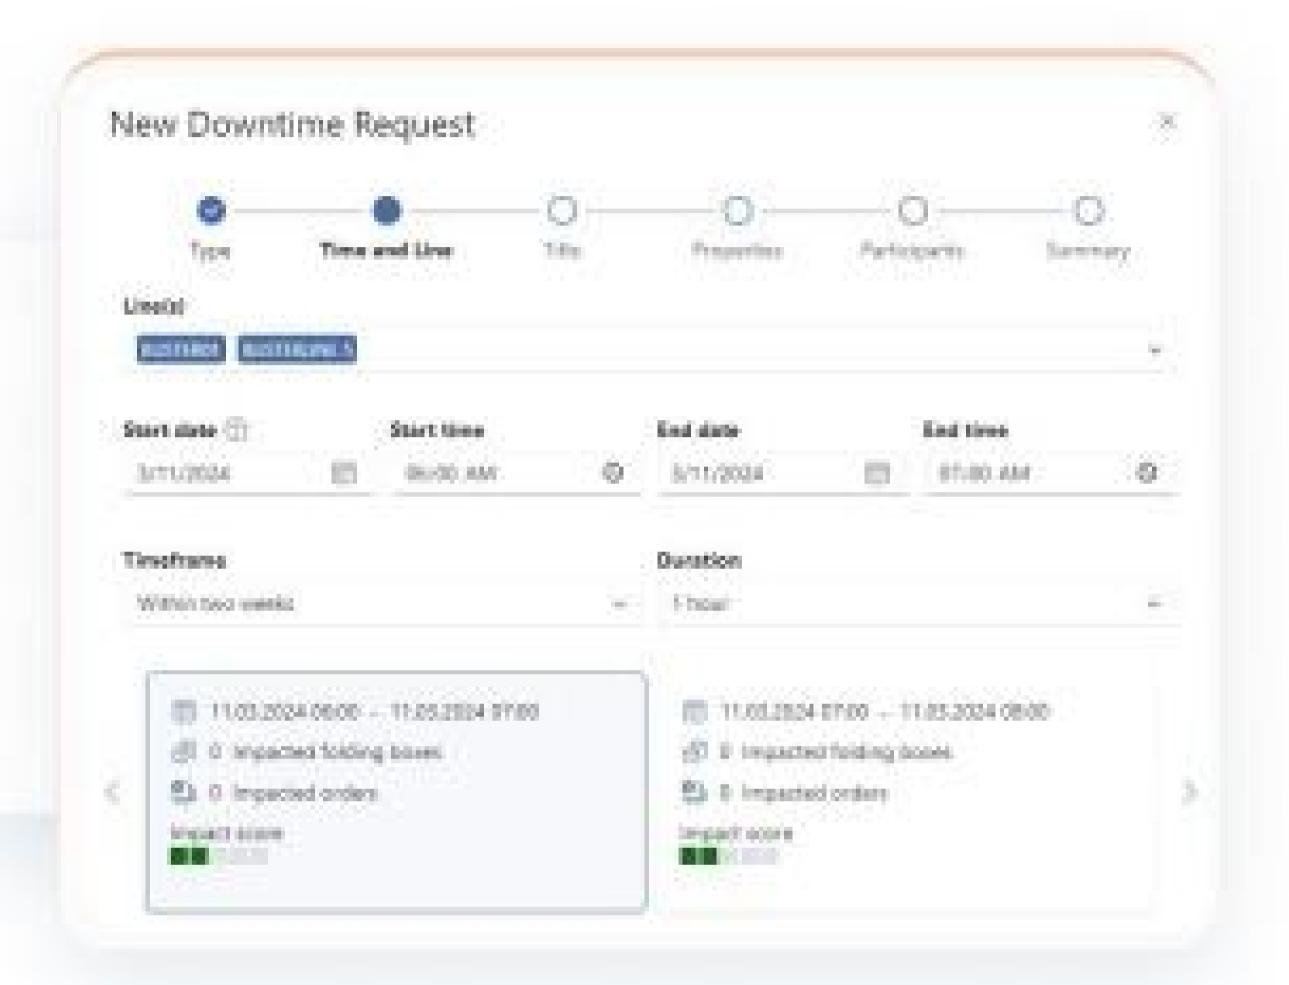

Get an exclusive preview of our Downtime Planner, designed to streamline maintenance scheduling and minimize operational disruptions for enhanced efficiency.

Downtime Workflow

Downtime Wizard for creating downtimes with automated suggestions based on Production Impact

New Downtime Request Line(s) Stort date Stort time find time Drud data (E) 07:00 XM 06:00 AM D 1/11/0924 3/11/2004 Timeframe Duration or Though Witting they marks T +1.03.2004 06:00 + 11.03.2004 07:00 TH-H-05-2024-07/00 + 11-05-2024-00-00 (III I Impacted folding being 65 0. Impacted folding boxes 5 0 Impacted orders. \$3. If impacted orders Impact supre-Impact score **ES** SECTION .

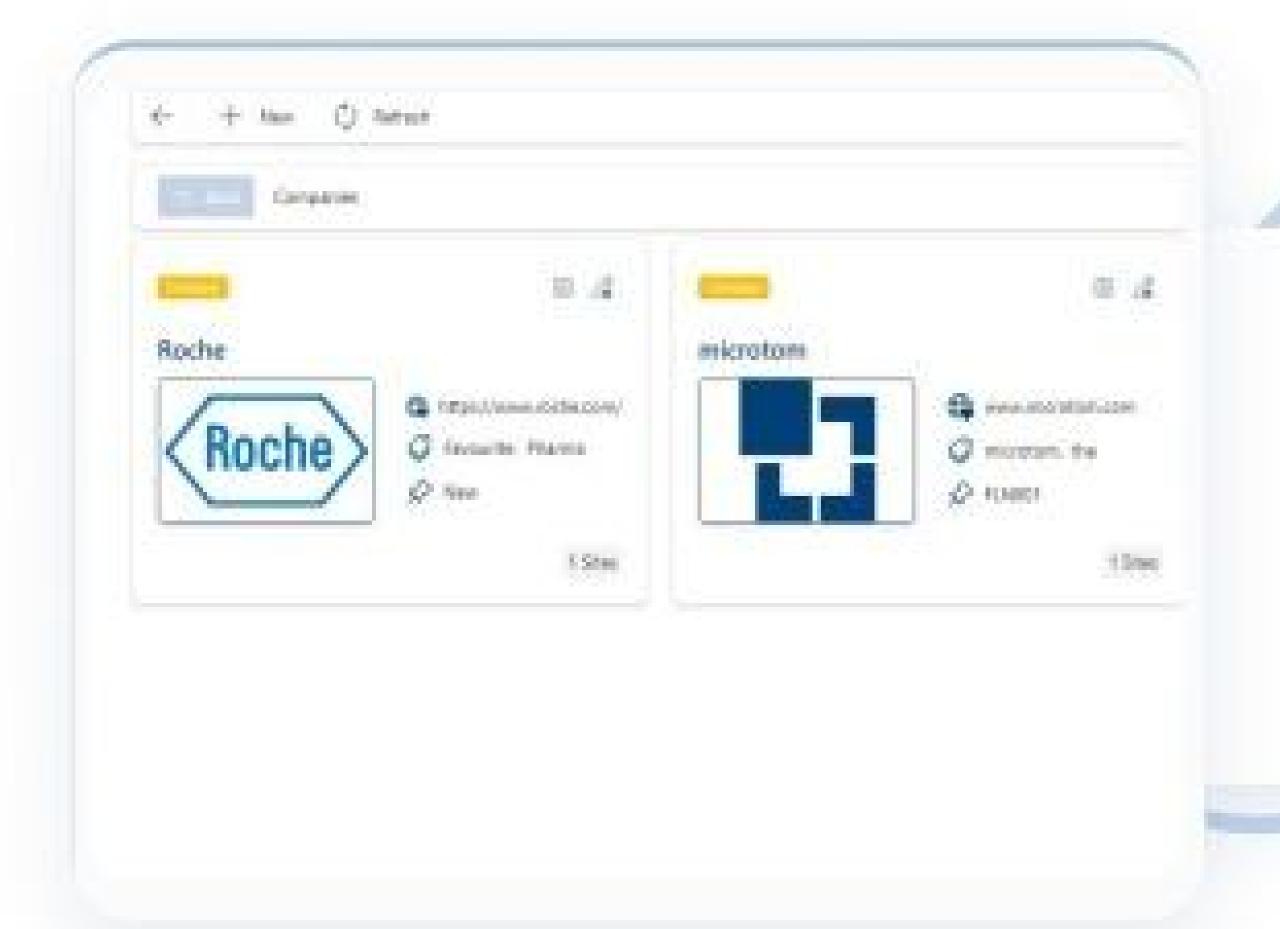

2 Downtime Insights

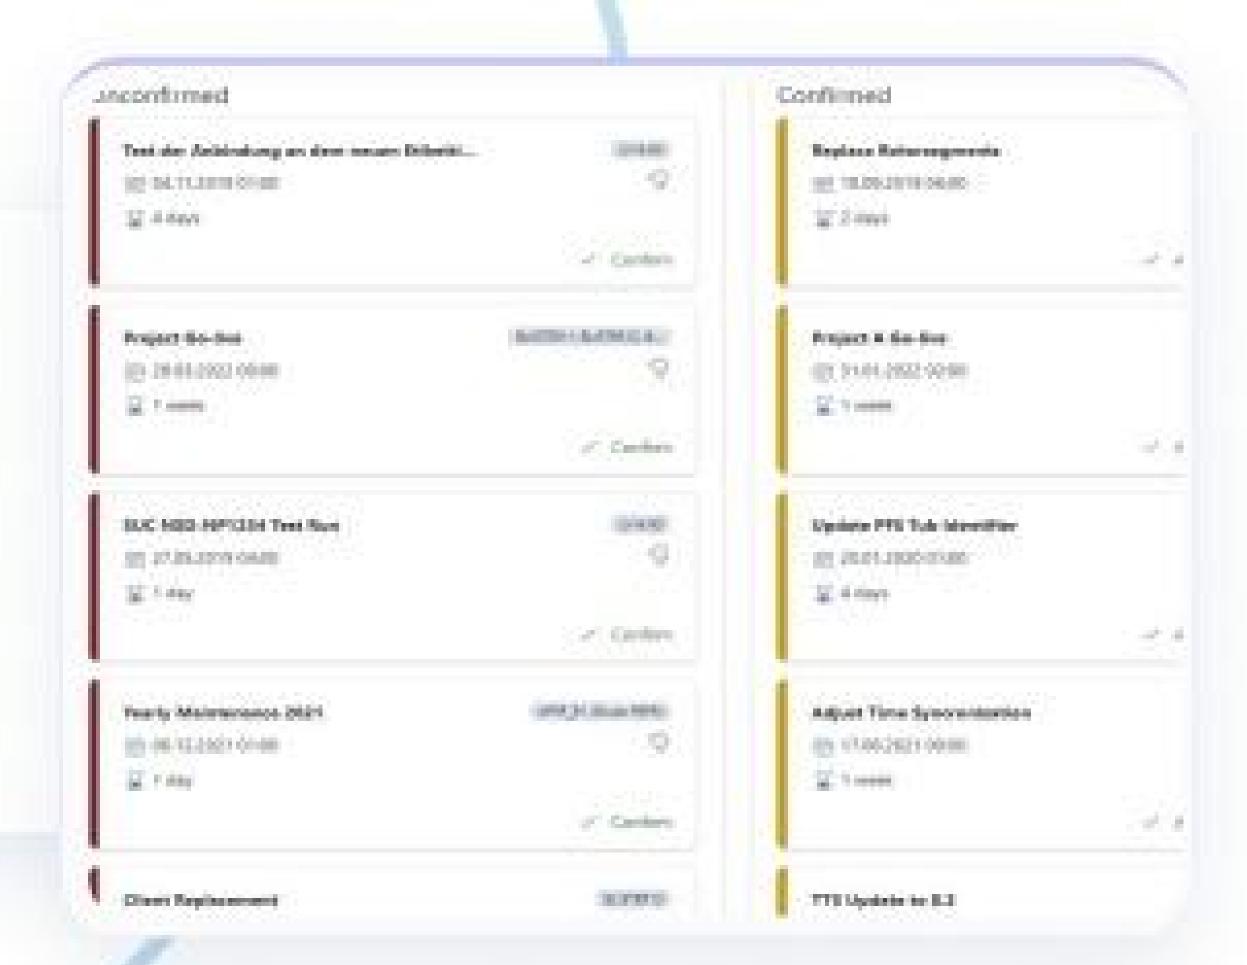

Provides an advanced interface for meticulous scrutiny of timelines, activities, tasks, and order impacts, while offering a collaborative platform to strategize on downtime management.

Stay In Control

Advanced interface for meticulous scrutiny of timelines, activities, tasks, and order impacts, while offering a collaborative platform.

Environment Builder

Downtime Wizard for creating downtimes with automated suggestions based on Production Impact

Generating Impact Across Your Manufacturing Process

Reduction of Order Lead Times

Reduced Unplanned Downtime

Enhancement of Manufacturing Speed, Safety, And Efficiency.

Increased OEE

Minimization of Material Waste
